

BODY PATCHES

Integral Cellulitis + Flaccidity Treatment

With Firming Patches

The two problems of the body most statistically critical for today's women are Cellulitis and Flaccidity.

Cellulitis is a problem that affects almost all women to some extent and is basically due to an accumulation of fat, toxins and water in the conjunctive tissue, which the body cannot easily eliminate. The result is the matt and aged cushioned appearance or orange peel skin.

In terms of the flaccidity of the tissues, this is often due to a change in weight and chronological ageing. Its origin is the degradation of supporting fibres: Collagen and Elastine.

SELVERT has created the integral treatment to eliminate these accumulations and to return elasticity to the tissues through the exclusive Firming Patches. The treatment also returns a bright shade to the skin and helps re-establish the correct lymphatic circulation.

Professional Cellulitis and Flaccidity Treatment Pack. (6 sessions)

This treatment develops its incredible multi-power through its three phyto-cosmetic products:

- **Biological Drainer.** Serum that promotes circulation and helps restore lymphatic circulation. Drip for 6 sessions.
Contains: Cypress extract, Horse Chestnut Extract, Ginkgo Biloba Extract and Essential Juniper Oil.
- **Anti-cellulite, Diaphoretic Gel.** That helps metabolise fat nodules. Jar for 6 sessions.
Contains: Theophyllisilane, which metabolises the nodules and re-establishes oxygenation of the tissue thanks to the Algae Extract.
- **Enzymatic Action Cream.** That eliminates the remains of inoperative cells in the adipose tissue. Jar for 6 sessions.
Contains: Essential Pine Oil, Pineapple and Papaya Extract.

Firming Action Patches. That returns lost elasticity and turgidity by eliminating the nodules cellulitis. Blister pack with patches for 6 sessions.

Contains: Hyaluronic Acid, Vitamins A and E, Allantoin and Glycolic Acid.

Cellulitis + Flaccidity Continuity Treatment Pack

- **Anti-cellulite Action** that metabolises fat nodules and re-establishes oxygenation of the subcutaneous tissue.
- **Draining Action** that promotes circulation and lymphatic circulation, leading to the elimination of fat.
- **Enzymatic Action** that eliminates the remains of inoperative cells in the adipose tissue.

Firming Action Patches.

Apply the phyto-cosmetic cream every morning. Apply the Firming Patches at night.

Maximum effect natural components:

Laminaria, Guaraná, Lemon, Ruscus, Jojoba Extracts and Other Vegetable Extracts.

R.P. pack. bot. 200 ml + patches 3 nights.

R.P. blister pack patches 6 nights.

OPERATING SYSTEM FOR THIS TYPE OF PATCH

UNLIKE THE HYDROGEL PATCHES, THE SELVERT FIRMING PATCHES HAVE THEIR ACTIVE PRINCIPLES DISPERSED DIRECTLY ON THE ADHESIVE OF THE PATCH AND PROTECTED BY A COMPLETELY WATERPROOF LAYER, IMPLYING THAT THE SKIN ABSORBS 100% OF THE ACTIVES.

8 HOURS OF CONTINUAL ACTION: THEY GUARANTEE THE UPKEEP OF THERAPEUTIC LEVELS FOR 8 HOURS, AS THE FIRMING PATCHES ARE THE ONLY ONES TO BE EFFECTIVE ON THE SKIN FOR OVER 30 MINUTES, THANKS TO THEIR "DROP IN DROP" CONTINUAL DRIPPING SYSTEM.

WIDE RADIUS OF ACTION: THIS TYPE OF PATCH ACTS ON A SURFACE AREA 2 OR 3 TIMES LARGER THAN THE PATCH ITSELF.
